

On the trail,
your best friend
is strong and
dependable tack.

Independent laboratory tests show that LEATHER THERAPY makes tack stronger than the day it left the tannery.

- LEATHER THERAPY Wash & Restorer increased the tensile strength of leather 36%, from 3600 lbs./square inch to 4900 lbs./square inch.
- LEATHER THERAPY Restorer inhibited mold growth beyond the treatment already present in leather the day it left the tannery.

LEATHER THERAPY
INHIBITS MOLD & MILDEW

Makes Leather Behave...Beautifully
