

TRIED 'n TRUE — PRODUCTS PUT TO THE TEST

PRODUCT: Brush Therapy Brush Cleaner.
MANUFACTURER: JOZ Inc.
WHAT IT IS: A specially designed cleaning product for horse brushes.

WHO WOULD BUY THIS PRODUCT: Anyone who has one or more filthy horse brushes currently sitting in a tack locker.

COMMENTS FROM OUR TESTERS: A series of very dirty brushes were brought into the Tack 'n Togs Test Studio.

"I'm kind of ashamed to say they're all mine," said editor Paul Wahl, "but who ever thinks about cleaning brushes?"

A packet of Brush Therapy was added to a gallon of water in a plastic pan and the brushes initially inserted such that only one side was exposed to the cleaner. Brush Therapy sizzles and foams at first, then goes to work on dirt, bacteria and fungi. After eight minutes, the brushes were removed.

"The results were noticeable," Wahl said. "We didn't scrub them at all—just pulled them out and examined them."

A small comb was used to remove hair stuck in the bristles.

The product comes in easy portable packages along with

a countertop display for retail use.

For test purposes, we only immersed one side of the brushes. While all three came out clean, the one with the lightest bristles provided the best image.

"This product blew us away!"
 Not only did it do a super job of cleaning the horses, but two weeks later their coats STILL glisten, shine and are super soft! The "test" horses were kept outside and even went through TWO muddy rainstorms. Notwithstanding such harsh conditions, the dirt slides off and coats glisten like new!
WE HAVE NEVER SEEN A PRODUCT PRODUCE RESULTS LIKE THIS!"
