Equine Products  
*Quality Ingredients,  
Researched and  
Recommended.*

## COSEQUIN®

All equine joint health supplements are not equal. Many don't contain the ingredients they claim on the label. How can you be sure the supplement you're giving your horse is both safe and high quality?

*Be sure Cosequin is on the label.*

Other supplements might make strong claims. Cosequin backs its claims with research and manufacturing standards similar to the pharmaceutical industry. You and your horse work hard. You have more important things to think about than whether your equine joint health supplement lives up to its claims and provides the value you're paying for.
